### GOOD PRACTICE TEMPLATE

#### Description of the Good Practice Collection Activity in the TRANSIT Project

*The need behind the production of IO1 is to understand how much has been done so far by the partner organizations around the issue and what has been the impact and effectiveness of the past efforts/initiatives on mobility habits of local citizens. In addition, this output will provide a clear-cut definition of the resources available in terms of infrastructures and mobility solutions already realized or ideated by partners at local level.*

#### Related activities on the project workplan:

*IO1/A6: Elaboration of a Template to collect the good practices on promoting sustainable mobility for changing the habits of locals, already implemented by each partner organization.*

*IO1/A7: Identification and Collection of the Good Practices already implemented at local level.*

**Please, describe below two past initiatives on promotion of Sustainable Mobility that you have already implemented at local and regional level that you would like to share with the other TRANSIT Project Partners.**
