

TRANSIT is a 3-year Project that involves seven partners from four EU countries (Italy, Sweden, Spain, and Greece).

Inspired by Sustainable Development Goals, in particular the goal 13 on climate action, the project partners feel the urgent need to raise awareness on sustainable mobility among citizens, by stimulating behavioural and mindset changes of citizens towards the use of sustainable means of transport, mainly bike, in their ordinary daily activities.

To achieve this goal the partnership will work together to develop 3 main outputs: a background analysis on sustainable mobility at local level, 2 dedicated e-learning modules and a toolkit that may support civil servants and other stakeholders in their work to promote sustainable mobility.

We would appreciate you taking the time to complete the following survey to help us explore your mobility habits, experience, and preferences at local level.

It should take no more than 5-7 minutes of your time. Your responses are voluntary and will be confidential and used only for the project purpose. Your answers are valuable for us.

Information about the project available at: <https://www.kau.se/en/transit>
